Calaveras County Economic Development Extends Community Survey

Calaveras County Economic & Community Development Department is extending the time residents and business owners have to submit their input on the community survey. The survey seeks input on what opportunities exist for improving and growing our local economy, as well as identifying challenges communities may be facing. The County will tabulate responses, provide a summary report of findings, and develop priorities that will focus on building a resilient local economy for the coming years.

This survey is part of the County's overall strategic planning process and should only take respondents approximately 10 minutes. Your input and opinions are critical!

The survey is available both online and in paper form. Survey forms will be available at each of the County's eight public libraries. To complete the survey please visit: <https://forms.calaverasgov.us/Surveys/Community-Economic-Development-Survey>

If you have any questions, or would like a paper survey mailed to you, please contact Kathy Gallino at 209-754-6742 or by email at KGallino@co.calaveras.ca.us.
